Opportunity

Enterprise Residential provides exceptional service for its portfolio of senior and family living communities. A leader in the affordable housing industry throughout the Mid-Atlantic region, Enterprise Residential manages more than 80 apartment communities. With the commitment to improving the quality of life for residents while ensuring each community meets the highest standards in the industry, energy management is a priority for Enterprise Residential.

Our Solution

MD Energy Advisors created a comprehensive energy purchasing strategy for Enterprise Residential that has resulted in energy savings for almost 45 affordable housing senior living and family living communities. The strategy also brought budget stability to the communities by locking in rates for a four-year period.

"Not only does our new partnership with MD Energy Advisors reflect a reinforcement of our commitment to advancing racial equity by seeking out minority-owned business partners, but it also helps to achieve efficiencies in our communities and delivers on our promise of best-in-class property management to residents"

Gayle Filo
Enterprise Residential President

MD Energy Advisors makes energy choices simple.
